Introduction

In past years, the WITH Newsletter has included a report on the prior year's annual meeting, news of members section, summary of listserv discussions, and membership roster. As our online capabilities grow and members' access to online information appears complete, we are going to peel sections off from the newsletter on to separate links on the website. These include the annual report, roster, and the annual summary of listserv discussions. The membership roster posted to the WITH website will include names and affiliations/self-descriptions. A roster with complete member contact information will be emailed separately to everyone on the listserv. If you are not on the listserv, you may request a copy of the roster from molly.berger@case.edu. Instructions for joining the listserv can be found on the WITH website.

Women in Technological History (WITH) is a Special Interest Group (SIG) within SHOT whose membership includes both men and women interested in gender issues. WITH has a two-fold purpose: to serve as a support group to encourage and energize women working within the profession and as an activist group that seeks to foster and promote gender analysis within the history of technology. As founding member and former SHOT President Daryl Hafter has written, WITH's goal is to nurture "the subject and the people." Membership in WITH is open to all members of SHOT.

WITH Web address
